# 1928 <br> PEONIES <br> that are different 

## YOUR ORDER

Please consider this leaflet the same as a personal appeal for your peony order. I will make every effort to please you. Roots will be standard 3 to 5 eye size, properly cut. My fields are exceptionally free from disease and I will not knowingly send you a root affected with nematodes or Lemoine's disease. Varieties are true to name, and only worth while kinds are included in this list. Write me if you wish help in selecting.

You may use this leaflet as an order blank by marking the kinds wanted, signing your name and address on the back, and sending with remittance to me.

## TERMS

Cash with order or satisfactory reference. All roots are offered subject to prior sale, and to being in satisfactory condition when dug. Shipment of roots is made in the fall only, as soon after August 15 th as weather and other conditions allow, and any time up to November 1st. Early planting in September is strongly recommended.

SEND YOUR ORDER AS EARLY AS POSSIBLE. It is an advantage to both you and me.

Prices include delivery in U. S. east of the Rockies on orders of $\$ 4.00$ or more. On smaller orders add 30 c for postage and packing.

## EDW ARD AUTEN. Jr.

## Auten Varieties

The following varieties of my own origination were named and introduced in 1925, 1926 and 1927, and are the first results of work in breeding peonies begun more than ten years ago.

ALASKA-(1925) An unsual shade of red, possibly salmon, with lighter shadings in the center. Typical anemone bloom, perfect rose fragrance. It seems to meet the strictest commercial requirements as to substance and keeping qualities. Some growers do not like Alaska, some fanciers praise it very highly. $\$ 12.00$

CLORINDA-(1926) A fragrant, delicate blush white, full double crown type, a good keeper when cut. Not for sale 1928.

CORINNE-(1926) A cupped shell pink snigle, which will stay in ball shape for several days if cut unopened. Large and striking blooms if left on the plant . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . $\$ 5.00$

FANTASY-(1925) Anemone type but gives a Japanese effect. Outer petals deep pink, center yellow, occassionally one or two petals form a tuft in the center, the same color as the guards. Large size, slight fragrance. Resembles the Jap variety Queen Alexandra, but with me has excelled it in every way...... $\$ 10.00$

HUMORESQUE-(1925) Late blooming, a sure opener, and stands up as well in sudden hot spells as any variety I have, erect habit, not extra large, recommended where hot weather spoils the late kinds. Rather flat bloom, higher in center, three center petals forming a hollow ball till flower is full blown. Light pink with unusual markings of red, and unusual form of flower. Honorable mention, American Peony Society Des Moines, 1924. A variety that is "different". . $\$ 7.50$

MELODY-(1925) Anemone type, though many would call it Japanese. Outer petals softest pale pink, center petals short and pale yellow, a beatiful combination. Delightful rose fragrance. Extremely vigorous, enormous root system. This should become as popular as Mischief . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . $\$ 5.00$

MISCHIEF-(1925) Now well established as one of the finest single pink peonies. Brilliant in coloring, tall, vigorous, an exceptional keeper when cut. Won first at 1927 National Show. . . . . . . . . . . . . . . . . . . . $\$ 5.00$

MOLLY STARK-(1927) Crown type, no stamens, developing a high cone and tuft on mature plants. Very early. Guards pale pink, cone pale yellow, red splashes in center. Rose fragrant. Plant and stem good. . $\$ 3.00$

NIPPON BEACTY-(1927) A brilliant deep red Jap. The petals, petaloids and tips of carpels all the same shade. Tips of petaloids flushed and edged yellow. Tips of petaloids sharply incurved, giving an especial finish to the flower. Awarded the Brand Peony Farms special prize of $\$ 100$, at the 1927 National Show by the official Seedling Committee for a new Japanese variety of special merit and worthy of introduction. There are only seven one year plants of this variety in existence, and I offer in that size only, each. $\$ 110.00$

PRESTO- (1925) A brilliant medium dark red single, large blooms of good substance. One experienced grower says, "To my mind Presto is the coming red in singles." Plant habit extra good........ $\$ 5.00$

ROSALIE-(1927) A dwarf, stiff stemmed medium red double, the opening bloom (entire, not merely the center) being remarkably similar in color and form to an American Beauty rose. Bloom not large, a few stamens well hidden. This was much admired at 1926 Mid-West show at Des Moines . . . . . . . . . . . . . $\$ 10.00$

RUBY-(1927) A very early, brilliant, glossy, medium dark red, double, may have a very few hidden stamens. Stems stiff $\$ 20.00$

SCARF DANCE-(1927) Color range from white to deep pink, almost the same as Therese. Type just past the single stage, several rows of very narrow and very long petals, with a few shorter petals in center. Few if any stamens. Stems are stiff, height about 34 inches. Many admired this at 1927 national show. Has especial charm of form, best displayed by putting one bloom in a slender bud vase. . . . . . . . . . . $\$ 15.00$

## Single Peonies, Seedlings

The single peonies are especially charming in the garden, being less formal than the doubles, and are not so badly weighed down after a storm. From my seedling beds I can offer divisions in mixed colors, at \$ .75 each, 4 all different for $\$ 2.00,10$ assorted for $\$ 4.00,100$ for $\$ 35.00$. These are especially effective in mass planting, as well as among the mixed perennials.

## Seedling Doubles

Seedling doubles and semi-doubles from the seedling beds, in endless form and colorings, $\$ 1.25$ each, 4 for $\$ 4.00$, all different, 10 assorted for $\$ 8.00 ; 100$ for $\$ 75.00$. These are also good in mass plantings.

## Standard Varieties

## My Peony Fields

Now comprise about three acres, and in them the development of new varieties is given first consideration. In 1928 about 5,000 plants from seed will bloom. These all differ in some respect, and present a marvelous sight when in bloom. There are also about 250 of the choicest named kinds.

Visitors are always welcome during blooming tirae, which is usually May 24 th to June 12 th. State hard mad, Route 30 , runs past the field.

## YOUR OWN EXCLUSIVE VARIETY

For gardens of distinction I can supply entire stocks of some magnificent new varieties, either the original clump, or second trial stocks of from three to six clumps. Priced according to quality. Please write.

## Lilies October Shipment

SPECIOSUM RUBRUM-White flushed pink, dotted brown, commonly called the Japan lily. These are field grown from stock which has been here 40 years, thoroughly acclimated, and superior to impored bubs. Each, 35c; per dozen........................... . $\$ 3.50$
CROCEUM? or What?-A very vigorous, free blooming lily, upright blooms, shaped like a wine goblet, deep reddish orange, with darker spots, lasts well when cut, peculiar fragrance, a blaze of color as the peonies quit blooming. No one has yet been able to tell what variety this is, but professional growers re-order it from me in quantity.
Mammoth bulbs, each 45 c ; per dozen.......... $\$ 4.00$
Medium blooming size, per dozen. . . . . . . . . . . . $\$ 2.50$

## Seedling Siberian Irises

All from one seed parent, but running from purple through gray blue, sky blue to cream white. Of especial charm and daintiness, usually tall growing, very effective.

3 for $\$ 1.00,6$ for $\$ 1.75,25$ for $\ldots . . . . . . . .$.

## Bearded Irises

12 fine kinds, all labeled . . . . . . . . . . . . . . . . . . . . . $\$ 1.75$
25 assorted $\$ 2.50,50$ assorted $\$ 4.00,100$ assorted $\$ 6.50$ This from a carefully selected list.
